GAS PIPELINE

CUSTOM UTILITY MARKING PRODUCTS FOR EVERY APPLICATION

Safety is your company's top priority. That's why for more than 30 years William Frick & Company has produced innovative marking products made from highly-visible, rugged materials that have passed our stringent quality tests. Because we are ISO 9001:2000 certified, you can be confident that our products meet your high standards. But it's our professional service and rapid response that really sets us apart. We'll design a safety solution to fit your specific needs and deliver it quickly to help keep your workforce and the public protected. Call us today for a free no-obligation quote or visit us at www.fricknet.com to learn more.

DOMED POSTS ➤

These posts combine rugged construction with 360 degree visibility. Constructed with UV-stabilized, specially-formulated plastic to prevent fading and warping. Available in a wide range of post and cap color combinations with custom graphics permanently molded into the product so they won't fade, chip or peel. An anchor bar is included with each marker.

TEST STATION ➤ LINE MARKERS

These markers add a cathodic protection terminal enclosure to standard domed posts. Enclosures are constructed of Lexan polycarbonate high-impact plastic and rugged stainless steel hardware. Each unit comes with five standard terminals. Special compression lugs for easier wire attachment available. An anchor bar is included with each marker.

FIBERGLASS FLEXPOSTS

Durable, yet bendable marker springs back to its original position after impact with vehicles, equipment or livestock. Lightweight, fiberglass-reinforced composite material is customized on one or both sides with outdoor durable standard vinyl or reflective labels for maximum visibility. Labels can be laminated with UV-resistant materials to prevent fading and extend the life of the labels. Barcoding and serializing also available.

FLEXPOST DRIVER

For easy installation of flexpost markers. Insert the marker into the driver, rotate the tool into position, and set the marker with a few light taps.

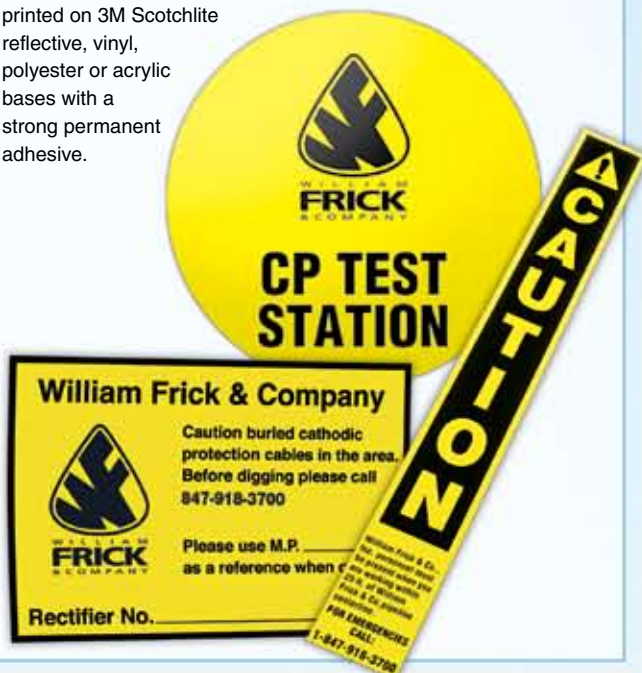

HEAVY-DUTY SIGNS ▲

Our durable signs ensure your message withstands the harshest elements season after season. Your custom message can be created in almost any shape and printed on baked enamel aluminum, heavy-duty polyethylene, porcelain or fiberglass. If your message requires long life and high visibility, we offer 3M reflective sheeting on aluminum.

LABELS

Our self-adhesive outdoor-durable labels can be laminated with UV-resistant materials for protection against fading, abrasion, and chemical contact. Custom legends, logos and colors are printed on 3M Scotchlite reflective, vinyl, polyester or acrylic bases with a strong permanent adhesive.

REFLECTIVE LABELS

Engineer-grade 3M Scotchlite reflective labels peel and stick to most surfaces. Heavy-duty lamination resists abrasion and chemicals and provides UV protection. Labels are sold in individual character packs (0-9, A-Z, blanks, dash, period) or in a complete kit with a convenient organizer case. Available label sizes are 1.75" x 2.875", 1" x 1.5", 0.75" x 0.75", or 0.371" x 0.571". Smaller sized labels can be used to mark mile post numbers or other information on marker posts, signs or custom labels.

"We're constantly testing and improving materials to find better ways to protect your assets and workers."

Sherry Weber
Business Development Manager

◀ CURB MARKERS

When large marking posts are not practical, curb markers provide a simple, long-lasting alternative to help prevent damage to buried pipeline. Markers are laminated with a maximum UVI resistant dome for 15-20 year outdoor durability. Common sizes are either 2.5", 3" or 4" diameter circles, although any color combination or size is available. Markers are permanently affixed to concrete with SB-12 adhesive, sold separately.

NEW

PAVEMENT MARKERS

Rugged and bold marker identifies pipeline beneath the street in all weather and traffic conditions. Constructed with woven rubberized fibers that won't discolor or peel. Subsurface printing prevents your message from wearing off. Easy peel-and-stick application; no special adhesive or installation equipment required. Excellent for high traffic areas, can be driven on immediately after installation. Standard sizes: 3" x 5", 10" dia., 15" dia., 17.5" dia. and 22" dia.

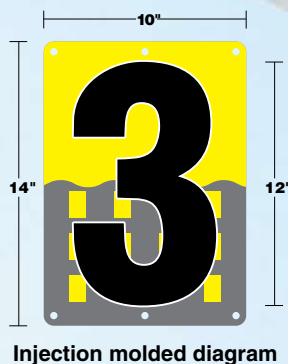

NEW
STAINLESS
STEEL STAKES
AVAILABLE

SOIL MARKERS

Outdoor grade plastic disk clearly identifies underground pipeline without protruding above the soil surface. Durable 7" diameter disk can be walked on or driven over by vehicles or mowers. Two-barbed plastic or stainless steel 13" stake holds the marker firmly in position. Rugged stainless steel stakes are ideal for use in hard or rocky soil conditions.

20+
YEARS
OUTDOOR DURABILITY

AERIAL MARKERS ▲

Bright markers help patrol planes quickly pinpoint pipeline locations. Constructed of injection molded polypropylene with maximum UV stabilizers for 20-year durability in any climate. Numbers are molded into the background color. Lightweight aluminum frame holds 2 or 3 characters and assembles easily. All components shipped in "tube" box for convenient storage and transport to the job site.

TYVEK WARNING TAGS

Outdoor-durable tags can be printed on one or both sides and customized with your company information. Tough woven material resists water, chemicals, tears and punctures and also provides a smudge-free writing surface.

◀ FLAGS, PAINT, TAPE

William Frick & Company offers three effective ways to temporarily mark buried pipeline:

Vinyl Flags can be custom printed with your company name, logo, and phone number. Available with wire or PVC staffs in 18", 21", 24", or 30" lengths.

Reusable, 4-Foot Flags tower over standard flags to provide visibility in tall grass, bushes and snow. Ideal for conditions when a permanent line marker is too much and a locating flag is too little.

Utility Marking Paint can be sprayed on asphalt, grass and soil. Available in black, all APWA standard colors and fluorescent colors. Water-based and solvent-based formulas available.

Buried Warning Tape helps prevent accidental dig-ins near your pipeline. Made with 100% virgin, lead-free polyethylene resins for strength and durability. Comes in various colors, lengths, and thicknesses that can be custom printed with your company's information. Detectable or super-stretch varieties also available. 3" or 6" widths.

POSTERS AND BANNERS

Keep important safety information front and center with a custom-designed poster or banner. We can design an eye-catching message in a variety of sizes and materials. Posters can be laminated for extra durability or framed for a more "finished" look.

CUSTOMIZED SAFETY SETS ▲

Continuously reinforce your safety program's message with a coordinated set of posters, pocket safety cards, table tent cards, labels, signs, banners and supporting literature.

POCKET CARDS

Carry-along cards provide quick and easy reference for workers in the field. Ideal for work procedures, safety instructions and technical terms. Waterproof, outdoor-durable material can be tailored to your company's program with customized colors, sizes, logos and photos.

EMERGENCY HARD HAT LABELS

Brightly colored label documents vital worker information in the event of an emergency. Unique shape fits the inside contours of a helmet without wrinkling. Includes spaces for employee ID number, blood type, medications, allergies, medical conditions and emergency contacts. A clear laminate flap protects handwritten information. Available in custom colors with your company logo.
